

Whole House PMP w/ Vent Duct Cleaning - \$499:

- Washer - maintenance includes the following services: check seals and hoses, clean out accessible drain pump filters, pull and clean dispenser and housing. On top load machines, clean agitator and tub ring and on some top loaders the washer will be opened up and top of tub cleaned. Run a clean cycle when applicable.
- Dryer - maintenance includes the following services: vacuuming the interior of the dryer to eliminate lint build-up and fire hazards. If the dryer has rollers, posts will be properly cleaned and lubricated. Transition hose will be cleaned thoroughly and checked for leakage. Check water valves when applicable for leaks.
- In addition we will inspect all connections, operations, balance and more; diagnosing any minor issues (some issues may incur a return trip with a qualified service technician) while ensuring your laundry machines are operating efficiently and correctly.
- Refrigerator - maintenance includes the following services: vacuuming and cleaning behind and underneath your fridge; thorough cleaning of the condensing coil, fan, motor, and drip pan if accessible; inspecting connections, motor, fan, water lines, check for drain plugs, etc., diagnosing any minor issues (some issues may incur a return trip with a qualified service technician).
- Dishwasher - maintenance includes the following services: inspecting original installation; securing and leveling as needed; cleaning out the food catch, sump area, sprayer arms and drain line, pull toe plate and check for leaks underneath, diagnosing any minor issues (some issues may incur a return trip with a qualified service technician).
- Checking air gap to disposal hose for debris and blockage when applicable, diagnosing any minor issues (some issues may incur a return trip with a qualified service technician).
- Garbage disposal - inspection includes the following services: checking motor and grinder operation. Cleaning the interior of garbage disposal with ice.
- Oven - Test at 350 degrees and calibrate if necessary and possible.
- Cooktop - inspect burners for proper operation and clean gas burners if necessary.
- Clean out the dryer vent duct or a second appliance can be substituted.
- Qty 1 - 30 minute consult, complimentary on install of new appliance (a \$125 value).
(Cumulative rollover to next year upon renewal)

Extra Value - included for 1 year from date of purchase, client will be extended automatic \$50 discount off labor per appointment.

Most repairs are \$125 - \$250 + parts. Some repairs do require extra labor, extra fees for additional manpower, mileage fees, out of area service, fees for expediting or extra/special equipment to perform the repairs and/or maintenance. These fees should be discussed prior to A+ Certified Appliance being contracted to perform maintenance, service or labor.
